CLEAR SKIN IN A FLASH

THE FUTURE OF ACNE TREATMENT

Model. Not actual patient.

www.aviclear.com

WHY AVICLEAR?

AviClear is a laser treatment that specifically targets the source of acne - the oils on your skin.³

Achieve lasting results in **three, 30-minute treatment sessions with no downtime**, no prescriptions and no harmful side effects.^{1,3}

EFFECTIVE

AviClear treats active acne and helps prevent future acne by suppressing the sebaceous glands.

SAFE

AviClear is safe for all skin types, tones, and acne severities, and is free of harmful side effects and chemicals.^{1,2}

COMFORTABLE*

AviClear is designed with AviCool™ contact cooling technology that allows for a safe and comfortable treatment experience.*

FAST

AviClear treatments are convenient and fit into the busiest of schedules. Each treatment session should last approximately 30 minutes.¹

Moderate to severe acne sufferers wish they could **RELIVE MOMENTS** they missed due to acne!¹

FAQs

AM I A CANDIDATE?

AviClear is ideal for patients searching for a safe and effective alternative to traditional acne treatments. The treatment is safe for all skin types and tones, and can be used on adolescents and adults.

WHAT AREAS CAN BE TREATED?

AviClear was evaluated on the face. Ask your provider to evaluate your skin and determine if other problematic areas can be treated.

WHAT DOES THE TREATMENT FEEL LIKE?

During treatment, you may notice a light snapping sensation. In clinical studies, patients tolerated the treatment well and were very satisfied with the treatment experience and outcomes.

WHAT SHOULD I EXPECT AFTER TREATMENT?

After the AviClear treatment, you may experience mild redness and swelling from one hour up to two days. Acne flare-ups may occur, but are temporary and should resolve with time. We recommend applying SPF 30+ sunblock daily throughout your treatment series.

WHEN WILL I SEE RESULTS?

You should start seeing results around 3-4 weeks after your last treatment session. Results may continue to improve with time.¹
